## 1. Installation Process

**To install the extension, you need to follow below steps**

- Enable all cache from admin (System > Cache Management) before upload extension.
- Extract extension zip package and copy all folders (app, lib, skin).
- Upload all folders (app, lib, skin) to your site by FTP.
- After uploading all files clear all cache from admin (System > Cache Management).
- Logout to complete installation process and login again otherwise you will get 404 Error.
- Check “Blog” extension tab available or not into admin navigation.

## 2. Blog Configuration

### 2.1 General

**Blog Configuration** [Save Config](#)

**Blog**

Enable Blog	<input type="text" value="Yes"/>	[STORE VIEW]
▲ Enable/Disable extension.		
Enable jQuery	<input type="text" value="Yes"/>	[STORE VIEW]
▲ If already used jQuery library in current theme then disable it. i.e. Magento 'rwd' default theme provides 'jquery-1.10.2.min.js' file then no need to enable it.		
Blog URL	<input type="text" value="blog"/>	[STORE VIEW]
▲ Relative to Website Base URL		
Enable Top Link	<input type="text" value="Yes"/>	[STORE VIEW]
Enable Footer Link	<input type="text" value="Yes"/>	[STORE VIEW]
Enable Breadcrumbs	<input type="text" value="No"/>	[STORE VIEW]
Blog Layout	<input type="text" value="Grid"/>	[STORE VIEW]
No. of Grid Column	<input type="text" value="Four Column"/>	[STORE VIEW]
Blog Page Layout	<input type="text" value="2 columns with right bar"/>	[STORE VIEW]
Blog Title	<input type="text" value="Blog"/>	[STORE VIEW]
Meta Keywords	<input type="text"/>	[STORE VIEW]
Meta Description	<div><input type="text"/></div>	[STORE VIEW]
▲ Maximum 255 chars		
Enable Canonical URL	<input type="text" value="Yes"/>	[STORE VIEW]
▲ Enable/Disable canonical URL.		

- **Enable Blog:** To enable or disable blog extension.
- **Enable jQuery:** To enable or disable jQuery. If already used jQuery library in current theme then disable it. “i.e. Magento 'rwd' default theme provides 'jquery-1.10.2.min.js' file then no need to enable it.”

- **Description:** To display post description on frontend.
- **Short Description:** To display post short description as a excerpt on frontend post list page.

### 3.3 Association

The screenshot displays the 'Edit Post' interface for a post titled 'Where does it come from?'. On the left, a sidebar under 'Post Information' includes links for 'Post Information', 'Content', 'Association' (which is active), 'General', 'Design', and 'Meta Data'. The main area features a top bar with buttons: 'Back', 'Reset', 'Delete Post', 'Duplicate Post', 'Save Post', and 'Save And Continue Edit'. Below this is the 'Post Association' section, which contains three fields: 'Post Categories \*' with a multi-select dropdown showing 'Media', 'Technology', and 'News'; 'Tags' with a text input containing 'Technology'; and 'Comments' with a dropdown menu set to 'Enabled'. A tooltip for the categories field reads 'Hold CTRL to select multiple', and a tooltip for the tags field reads 'Add multiple Tags separated by comma'.

- **Post Categories:** To assign post categories. Hold CTRL to select multiple.
- **Tags:** Add multiple Tags separated by comma. Here you can see auto suggest tags.
- **Comments:** To enable/ disable post specific comments.

- **Is Featured :** To set post as featured post.
- **Publish Date:** Admin can select date to publish post. Leave empty to use current datetime.
- **Author:** To assign post author.

### 3.5 Website

The screenshot shows the 'Edit Post' interface in a Magento Admin panel. On the left is a sidebar with 'Post Information' selected. The main area has a title 'Edit Post 'Vestibulum ante ipsum primis in faucibus'' and a row of buttons: Back, Reset, Delete Post, Duplicate Post, Save Post, and Save And Continue Edit. Below this is a 'Website' section with a 'Store View \*' label. A dropdown menu is open, showing a list of store views: 'All Store Views', 'Main Website' (with 'Main Website Store' as a sub-item), 'Default Store View', 'Test Website' (with 'Test Store' as a sub-item), and 'Test Store View'. A hint at the bottom of the dropdown says '▲ Hold CTRL to select multiple'.

- **Store View:** To assign store specific post. Hold CTRL to select multiple

### 3.6 Design

The screenshot shows a web application interface for editing a post. On the left is a sidebar with a 'Post Information' header and a list of tabs: 'Post Information', 'Content', 'Association', 'General', 'Design' (which is highlighted), and 'Meta Data'. The main content area has a title 'Edit Post 'Where does it come from?'' and a row of action buttons: 'Back', 'Reset', 'Delete Post', 'Duplicate Post', 'Save Post', and 'Save And Continue Edit'. Below the buttons is a 'Design' section with two options: 'Page Layout' and 'Custom Layout Update'. The 'Page Layout' option is selected, showing a dropdown menu with the value '2 columns with right bar'. The 'Custom Layout Update' option is shown as a large empty text area.

- **Page Layout:** To change post specific frontend page layout.
- **Custom Layout Update:** To update post specific frontend Custom Layout Update.

- **Description:** To display category description on frontend.

## 4.3 Design

The screenshot displays the 'Edit Category 'Media'' interface. On the left is a sidebar with 'Category Information' (sub-items: Category Information, Content, Design, Meta Data). The main area has a title 'Edit Category 'Media'' and a toolbar with buttons: Back, Reset, Delete Category, Save Category, and Save And Continue Edit. The 'Design' tab is active, showing 'Page Layout' set to '1 column' and 'Custom Layout Update' containing the code '<remove name="footer" />'. A small 'WYSIWYG' icon is in the bottom right of the custom layout editor.

- **Page Layout:** To change category specific frontend page layout.
- **Custom Layout Update:** To update category specific frontend Custom Layout Update.

## 4.4 Meta Data

The screenshot displays a web interface for editing a category named 'Media'. On the left, a sidebar titled 'Category Information' contains a menu with 'Category Information', 'Content', 'Design', and 'Meta Data'. The 'Meta Data' option is selected. The main content area is titled 'Edit Category 'Media'' and features a row of buttons: 'Back', 'Reset', 'Delete Category', 'Save Category', and 'Save And Continue Edit'. Below this, the 'Meta Data' section is highlighted with a dark header. It contains three input fields: 'Meta Title' (a single-line text box), 'Meta Keywords' (a multi-line text box), and 'Meta Description' (a larger multi-line text box). A note at the bottom of the 'Meta Description' field states 'Maximum 255 chars'.

- **Meta Title:** To set category meta title.
- **Meta Keywords:** To set category Meta Keywords.
- **Meta Description:** To set category Meta Description. Maximum 255 chars

## 8 Import - Export

### 8.1 Import Data

The screenshot shows a web application interface for importing data. On the left is a sidebar with a menu item 'Import Data'. The main content area has a header 'Import Data' with three buttons: 'Back', 'Reset', and 'Import Data'. Below the header is a section titled 'Import Setting'. Inside this section, there is a label 'Select File to Import \*', a 'Browse...' button, and the text 'No file selected.'. Below this, a tip is shown: 'You can import blog data by uploading .csv file. See sample.csv file before import data.' with a link 'Download sample.csv'.

- **Select File to Import:** You can import blog data by uploading .csv file. See sample.csv file before import data. (See above snap)

## 9 Latest Post Widget

The screenshot shows a 'Widget Insertion' dialog box titled 'Insert Widget...'. It contains two main sections: 'Widget' and 'Widget Options'. In the 'Widget' section, 'Widget Type' is set to 'Blog: Latest Post' with a description 'Allows to add latest post to any page'. In the 'Widget Options' section, 'Blog Category ID(s)' is set to '1,2,3,4' with a description 'Enter (,) comma seperated category IDs to access multiple categories post'. 'Blog Layout' is set to 'Grid' with a description 'Default blog layout is "list". Set "grid" for grid layout or set "list" for list layout'. 'No. of Grid Column' is set to 'Three Column' with a description 'Set number of grid columns.'. 'Maximum Latest Post' is set to '5' with a description 'Default 5 post display'. An 'Insert Widget' button is located in the top right corner.

Widget Insertion	
<b>Widget</b>	
Widget Type *	Blog: Latest Post <small>Allows to add latest post to any page</small>
<b>Widget Options</b>	
Blog Category ID(s)	1,2,3,4 <small>▲ Enter (,) comma seperated category IDs to access multiple categories post</small>
Blog Layout	Grid <small>▲ Default blog layout is "list". Set "grid" for grid layout or set "list" for list layout</small>
No. of Grid Column	Three Column <small>▲ Set number of grid columns.</small>
Maximum Latest Post	5 <small>▲ Default 5 post display</small>

- **Widget Type:** Select “Blog: Latest Post” for latest post widget.
- **Blog Category ID(s):** Add comma separated categories if you want to show specific category wise posts. Leave empty for default latest posts.
- **Blog Layout:** Select latest post listing layout either grid or list
- **No. of Grid Column:** Select number of grid columns
- **Maximum Latest Post:** Add number to display latest number of posts. Leave empty for default latest 5 posts.

## 10 Featured Post Widget

The screenshot shows a 'Widget Insertion' dialog box titled 'Insert Widget...'. It contains two main sections: 'Widget' and 'Widget Options'. In the 'Widget' section, 'Widget Type' is set to 'Blog: Featured Post' with a dropdown arrow, and a description below it says 'Allows to add featured post to any page'. In the 'Widget Options' section, there are four fields: 'Blog Category ID(s)' with the value '1,2,3,4' and a description 'Enter (,) comma seperated category IDs to access multiple categories post. Leave blank to list all featured posts'; 'Blog Layout' with the value 'Grid' and a description 'Default blog layout is "list". Set "grid" for grid layout or set "list" for list layout'; 'No. of Grid Column' with the value 'Three Column' and a description 'Set number of grid columns.'; and 'Maximum Featured Post' with the value '5' and a description 'Default 5 post display'. An 'Insert Widget' button is located in the top right corner of the dialog.

- **Widget Type:** Select “Blog: Featured Post” for latest post widget.
- **Blog Category ID(s):** Add comma separated categories if you want to show specific category wise posts. Leave empty for default latest posts.
- **Blog Layout:** Select latest post listing layout either grid or list
- **No. of Grid Column:** Select number of grid columns
- **Maximum Latest Post:** Add number to display latest number of posts. Leave empty for default latest 5 posts.

### What is Lorem Ipsum?

May 11, 2017 | By [John](#) | [4 Comments](#)

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.

## 17 License

### What is allowed with single regular license

- You can use it on one website for yourself or for your client.
- You will need to purchase another regular license for another domain or clients.
- You can setup extension on your staging server for testing/development purposes (that setup shouldn't be available to the public).
- You can customize extension, you can modify it with other works as per your need.
- Extension updates will be available free for single website.

### What is not allowed

- It is not allowed to create multiple websites with single regular license. You will need to purchase multiple regular licenses for multiple websites.
- It is not allowed to copy our extension code to misuse or for other extension creation or for selling purpose.

## 18 Help & Support

Please read "User Guide" carefully, it will help you to resolve most of potential problems with incorrect configuration of the extension in Magento. If you don't find the answer to your questions, please watch our video from below url.

### Video - Extension Installation & Configuration guideline

Coming soon...! (Under Creation)

### Magento Support Policy

Magento configuration, installation, maintenance, customization etc. is beyond the scope of our support. We can provide you paid support on extension setup, customization & magento custom requirement. If you found bug within extension, please contact us at below email.

[support@pixlogix.com](mailto:support@pixlogix.com)

## Developed by

**PIXLOGIX INFOTECH PVT. LTD.** is a multi-disciplinary, award-winning web design, development and user experience company with special focus on website usability and responsive design. The PIXLOGIX team consists of a highly experienced team of specialists with an outstanding record of providing high quality deliverables both on a timely basis and at very affordable cost.

PIXLOGIX is a Global provider of web programming and IT services with clients based in the USA, UK, Australia, Finland, Spain, Netherlands and many more. Our communication skills are excellent and are pleased to participate in providing quotations per Requests for Quotation or proposals. We guarantee your satisfaction!
