1. Installation Process

To install the extension, you need to follow below steps

- Enable all cache from admin (System > Cache Management) before upload extension.
- Extract extension zip package and copy all folders (app, lib, skin).
- Upload all folders (app, lib, skin) to your site by FTP.
- After uploading all files clear all cache from admin (System > Cache Management).
- Logout to complete installation process and login again otherwise you will get 404 Error.
- Check “Flexible Forms” extension tab available or not into admin navigation.

2. Flexibleforms Configuration

2.1 General

Forms Configuration Save Config

General

Enable Forms	<input type="text" value="Yes"/> <small>▲ Enable/Disable extension.</small>	[STORE VIEW]
Enable jQuery	<input type="text" value="Yes"/> <small>▲ If already used jquery library in current theme then disable it. i.e. Magento 'rwd' default theme provides 'jquery-1.10.2.min.js' file then no need to enable it.</small>	[STORE VIEW]
Enable in Top Link	<input type="text" value="Yes"/> <small>▲ Enable/Disable Flexibleforms link in top link.</small>	[STORE VIEW]
Enable in Footer Link	<input type="text" value="Yes"/> <small>▲ Enable/Disable Flexibleforms link in footer link.</small>	[STORE VIEW]
Redirect Url	<input type="text"/> <small>▲ To redirect page after successful form submission. i.e. http://www.domain.com</small>	[STORE VIEW]
Enable for logged in users only	<input type="text" value="No"/> <small>▲ Allow permission to submit form for logged in users.</small>	[STORE VIEW]
Store Result in Database	<input type="text" value="Yes"/> <small>▲ Enable/Disable form results to database.</small>	[STORE VIEW]

- **Enable Forms:** To enable or disable flexibleforms extension.
- **Enable jQuery:** To enable or disable jQuery. If already used jQuery library in current theme then disable it. “i.e. Magento 'rwd' default theme provides 'jquery-1.10.2.min.js' file then no need to enable it.”
- **Enable in Top Link:** To enable or disable flexibleforms link on frontend Top link menu.
- **Enable in Footer Link:** To enable or disable flexibleforms link on frontend Footer link menu.
- **Redirect Url:** To redirect page after successful form submission. i.e. http://www.domain.com If admin want to redirect form after successful submission then add redirect url into this field otherwise leave it blank.

- **Enable for logged in users only:** Allow permission to submit form for logged in users only or for all.
- **Store Result in Database:** To enable or disable form results in database.

2.2 Admin Email Settings

Admin Email Settings
▲

Enable Email to Admin	<input type="text" value="Yes"/>	[STORE VIEW]
Admin Email Name	<input type="text" value="Admin"/> <small>▲ Set admin email name.</small>	[STORE VIEW]
Admin To Email Address	<input type="text" value="no-reply@domain.com"/> <small>▲ Set multiple admin email address separated by comma.</small>	[STORE VIEW]
Admin From Email Address	<input type="text" value="no-reply@domain.com"/> <small style="color: red;">This Email address must contain to the same domain as the site. i.e. no-reply@domain.com</small>	[STORE VIEW]
Admin Email Subject	<input type="text"/> <small>▲ Set admin email subject.</small>	[STORE VIEW]
Admin Email Template	<input type="text" value="Testing Admin Template Flexibleforms"/>	[STORE VIEW]

- **Enable Email to Admin:** To enable or disable admin email.
- **Admin Email Name:** Admin will get email from this Name.
- **Admin To Email Address:** Admin will get email to this email address.
- **Admin From Email Address:** Admin will get email from this email address. “This Email address must contain to the same domain as the site. i.e. no-reply@domain.com”
- **Admin Email Subject:** Admin email subject name.
- **Admin Email Template:** Admin can change admin email template from here.

2.3 Customer Email Settings

Customer Email Settings

Enable Email to Customer	<input type="text" value="Yes"/>	[STORE VIEW]
Customer Email Name	<input type="text" value="Support"/> <small>▲ Set customer email name.</small>	[STORE VIEW]
Customer Email Address	<input type="text" value="no-reply@domain.com"/> <small>This Email address must contain to the same domain as the site. i.e. no-reply@domain.com</small>	[STORE VIEW]
Customer Email Subject	<input type="text" value="Thank you for contact"/> <small>▲ Set customer email subject.</small>	[STORE VIEW]
Customer Email Template	<input type="text" value="Flexibleforms Customer Email (Default Template f"/>	[STORE VIEW]

- **Enable Email to Customer:** To enable or disable customer email.
- **Customer Email Name:** Customer will get email from this Name.
- **Customer Email Address:** Customer will get email from this email address.
- **Customer Email Subject:** Customer email subject name.
- **Customer Email Template:** Customer email template selection.

2.4 Product Inquiry Form Settings

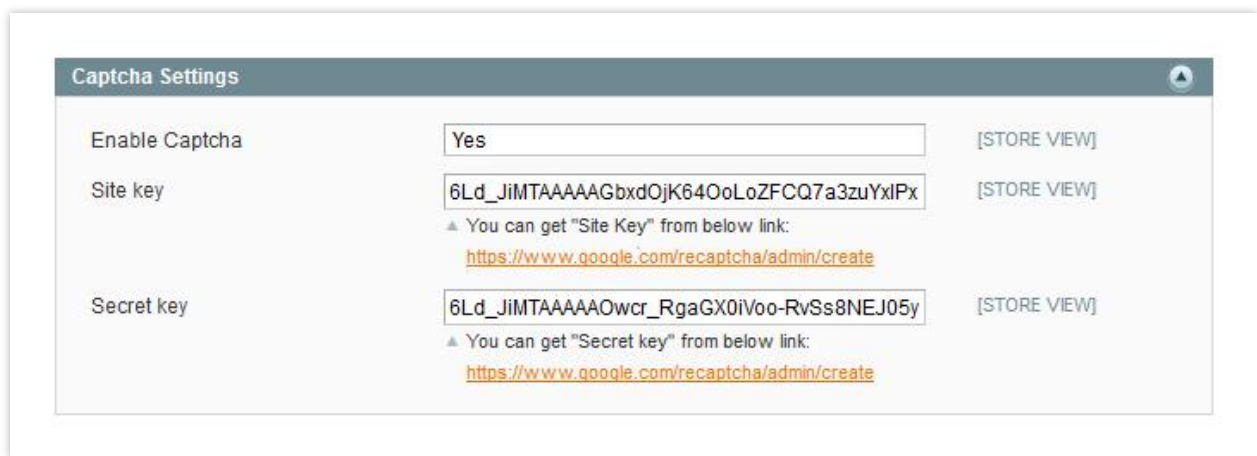

The screenshot shows the 'Product Inquiry Form Settings' configuration page. It features four main settings, each with a text input field and a '[STORE VIEW]' label to its right. Below each input field is a small triangle icon followed by a descriptive instruction.

Setting Name	Current Value	Label
Enable Product Inquiry	Yes	[STORE VIEW]
Display Title into tab/product collateral	Send Inquiry	[STORE VIEW]
Flexibleforms List	Product Inquiry Form	[STORE VIEW]
Product Attribute in Email	None (with dropdown menu open showing Product Name, Product Sku, Product Url)	[STORE VIEW]

Selected product attribute will display on product inquiry email

- **Enable Product Inquiry:** To enable or disable Product Inquiry form.
- **Display Title into tab/product collateral:** Enter text to display into tab/product collateral.
- **Flexibleforms List:** Select a form to display as product inquiry form.
- **Product Attribute in Email:** Selected product attribute will display on product inquiry email.

2.5 Captcha Settings

The screenshot shows the 'Captcha Settings' configuration page. It contains three main settings:

Setting	Value	Action
Enable Captcha	Yes	[STORE VIEW]
Site key	6Ld_JiMTAAAAAGbxdOjK64OoLoZFCQ7a3zuYxlPx	[STORE VIEW]
	▲ You can get "Site Key" from below link: https://www.google.com/recaptcha/admin/create	
Secret key	6Ld_JiMTAAAAAOwcr_RgaGX0iVoo-RvSs8NEJ05y	[STORE VIEW]
	▲ You can get "Secret key" from below link: https://www.google.com/recaptcha/admin/create	

- **Enable Captcha:** To enable or disable captcha. When admin enables captcha then must need "Site key" and "Secret key" fields values to use captcha.
- **Site key:** Admin can get "Site Key" from below link
<https://www.google.com/recaptcha/admin/create>
- **Secret key:** Admin can get "Secret Key" from below link
<https://www.google.com/recaptcha/admin/create>

3 Manage Forms (Admin Form Listing)

Manage Forms + Add Form

Page 1 of 1 pages | View 20 per page | Total 2 records found Export Reset Filter Search

Select All | Unselect All | Select Visible | Unselect Visible | 0 items Actions Submit

	ID	Title	Form Url Key	Fields	No. Of Results	Status	Action	Preview
Any								
<input type="checkbox"/>	2	Test Form Two	test-form-two	2	1 View Results	Enabled	Edit	Preview
<input type="checkbox"/>	1	Test Form One	test-form-one	14	8 View Results	Enabled	Edit	Preview

- **Id:** Form Id
- **Title:** Form Title
- **Form Url Key:** Form Url Key to see direct form instead of widget.
- **Fields:** It displays how many fields are available in this form.
- **No. Of Results:** It displays number of form submissions and Result page link.
- **Creation Time:** Form Creation time.
- **Update Time:** Form Update time.
- **Status:** Form Status.
- **Action:** Form edit page link.
- **Preview:** Form “Preview” page link for frontend.

3.1 Form Information (Add/Edit Form)

The screenshot shows the 'Edit form' interface for 'Test Form One'. The interface is divided into a sidebar on the left and a main content area on the right. The sidebar has a 'Form Information' section with sub-items: 'Form Information', 'General Settings', 'Email Settings', 'Fieldset List', and 'Fields List'. The main content area is titled 'Edit form 'Test Form One'' and contains the following fields and controls:

- Title ***: Text input field containing 'Test Form One'.
- Form Url Key**: Text input field containing 'test-form-one'. Below it is a small triangle icon and the text 'Form url key to view form on frontend.'
- Form Top Description**: A rich text editor with a 'Show / Hide Editor' button. The editor contains the text 'Form Top Description' and 'Lorem ipsum dolor sit amet, consectetur adipiscing elit. A massa. Cum sociis natoque penatibus et magnis dis partur'. Below the editor is a path indicator: 'Path: p » span » strong'.
- Form Button Text**: Text input field containing 'Submit Inquiry'. Below it is a small triangle icon and the text 'Form submit button text.'
- Status**: A dropdown menu with 'Enabled' selected.

At the top right of the main content area, there are two buttons: 'Delete Form' (with a trash icon) and 'Save Form' (with a checkmark icon).

- **Title:** Form Title
- **Form Url Key:** Form url key to view form on frontend.
- **Form Top Description:** To display form description top of form on frontend.
- **Form Bottom Description:** To display form description bottom of form on frontend.
- **Form Successful message:** To display successful message for successful form submission.
- **Form Fail message:** To display failure message after form submission failure.
- **Form Button Text:** To change frontend form submit button text.
- **Status:** To enable or disable this form.

14 License

What is allowed with single regular license

- You can use it on one website for yourself or for your client.
- You will need to purchase another regular license for another domain or clients.
- You can setup extension on your staging server for testing/development purposes (that setup shouldn't be available to the public).
- You can customize extension, you can modify it with other works as per your need.
- Extension updates will be available free for single website.

What is not allowed

- It is not allowed to create multiple websites with single regular license. You will need to purchase multiple regular licenses for multiple websites.
- It is not allowed to copy our extension code to misuse or for other extension creation or for selling purpose.
