1. Installation Process

To install the extension, you need to follow below steps

- Enable all cache from admin (System > Cache Management) before upload extension.
- Extract extension zip package and copy all folders (app, skin).
- Upload all folders (app, skin) to your site by FTP.
- After uploading all files clear all cache from admin (System > Cache Management).
- Logout to complete installation process and login again otherwise you will get 404 Error.
- Check “Shipping Availability” extension tab available or not into admin navigation.

2. Shipping Availability Configuration

2.5 Implementation Code

Implementation Code

(Recommended for developers) If you want to display Shipping Availability extension features on specific section (sidebar,pages, etc...) then you can choose one of the below options.

Add below code to a CMS Page or a Static Block

```
{{block type="shippingavailability/checkpostcode" name="shippingavailability.postcode" template="shippingavailability/product-checkpostcode.phtml"}}
```

Add code below to a template file

```
$this->getLayout()->createBlock('shippingavailability/checkpostcode')->setTemplate('shippingavailability/product-checkpostcode.phtml')->tohtml();
```

Add code below to a layout file

```
<block type="shippingavailability/checkpostcode" name="shippingavailability.postcode" template="shippingavailability/product-checkpostcode.phtml" />
```

(Recommended for developers) If you want to display Shipping Availability extension features on specific section (sidebar, pages, etc...) then you can choose one of the below options.

- **Add below code to a CMS Page or a Static Block:** Admin can add below code into any CMS page or a static block to display shipping availability functionality on frontend.

```
{{block type="shippingavailability/checkpostcode" name="shippingavailability.postcode" template="shippingavailability/product-checkpostcode.phtml"}}
```
- **Add code below to a template file:** Admin can add below code into any template file to display shipping availability functionality on frontend.

```
<?php echo $this->getLayout()->createBlock('shippingavailability/checkpostcode')->setTemplate('shippingavailability/product-checkpostcode.phtml')->tohtml(); ?>
```
- **Add code below to a layout file:** Admin can add below code into any layout file or category & CMS page “Custom Layout Update” field to display shipping availability functionality.

```
<block type="shippingavailability/checkpostcode" name="shippingavailability.postcode" template="shippingavailability/product-checkpostcode.phtml"/>
```

3 Manage Postcode (Admin Postcode Listing)

Manage Postcode

[+ Add Postcode](#) [📄 Import Data](#)

Export to: [Export](#) [Reset Filter](#) [Search](#)

Select All | Unselect All | Select Visible | Unselect Visible | 0 items selected Actions [Submit](#)

	ID	Postcode	Delivery Info	Is Ship	Is COD	Status	Action
Any	<input type="text"/>						
<input type="checkbox"/>	2	370002	7 business days	No	No	Enabled	Edit
<input type="checkbox"/>	1	370028	8-10 business days	Yes	No	Enabled	Edit

- **ID:** Postcode Id
- **Postcode:** Postcode of specific area.
- **Delivery Info:** Approx delivery days or any other information.
- **Is Ship:** It displays shipping availability or not.
- **Is COD:** It displays COD availability or not.
- **Creation Time:** Postcode creation time.
- **Update Time:** Postcode update time.
- **Status:** Postcode status.
- **Action:** Postcode edit page link.

3.1 Postcode Information (Add/Edit Postcode)

The screenshot shows a web interface for editing a postcode. On the left is a sidebar with a 'Postcode Information' tab. The main content area is titled 'Edit Postcode '370002'' and contains a form with the following fields:

- Postcode ***: Text input containing '370002'.
- Is Shipping Available ***: Dropdown menu set to 'No'.
- Is COD Available ***: Dropdown menu set to 'No'.
- Delivery Info.**: Text area containing '7 business days'. Below the text area is a note: 'Add delivery days i.e. 8-10 business days.'.
- Status ***: Dropdown menu set to 'Enabled'.

At the top right of the main area are two buttons: 'Delete Postcode' (with a trash icon) and 'Save Postcode' (with a checkmark icon).

- **Postcode:** Postcode of specific area.
- **Is Shipping Available:** Set this postcode for shipping availability.
- **Is COD Available:** Set this postcode for COD availability.
- **Delivery Info:** Admin can set approx delivery days or any other information.
- **Status:** To enable or disable this postcode.

4 Import Postcode

The screenshot shows a web interface for importing data. On the left is a sidebar with a menu item 'Import Data'. The main content area has a header 'Import Data' with three buttons: 'Back', 'Reset', and 'Import Data'. Below the header is a section titled 'Import Setting'. Inside this section, there is a label 'Select File to Import*' followed by a 'Browse...' button and the text 'No file selected.'. Below this, there is a tip: 'You can import postcode data by uploading .csv file. See sample.csv file before import data.' and a link 'Download sample.csv'.

Import Data

- **Select File to Import:** You can import postcode data by uploading .csv file. See "[Download sample.csv](#)" file before import data.

8 License

What is allowed with single regular license?

- You can use it on one website for yourself or for your client.
- You will need to purchase another regular license for another domain or clients.
- You can setup extension on your staging server for testing/development purposes (that setup shouldn't be available to the public).
- You can customize extension, you can modify it with other works as per your need.
- Extension updates will be available free for single website.

What is not allowed?

- It is not allowed to create multiple websites with single regular license. You will need to purchase multiple regular licenses for multiple websites.
- It is not allowed to copy our extension code to misuse or for other extension creation or for selling purpose.
