1. Installation Process

To install the extension, you need to follow below steps

- Backup your web directory and store database
- Enable all cache from admin (System > Tools > Cache Management) before upload extension.
- Extract extension zip package and copy folder (app).
- Upload (app) folder to your store root folder by FTP.
- After uploading (app) folder navigate to your store root folder in the SSH console of your server:
 - `cd path_to_the_store_root_folder (cd public_html)`
 - Run the following command:
 - `php bin/magento setup:upgrade`
 - `php bin/magento setup:static-content:deploy`
- Flush the store cache; Logout to complete installation process and login.

Implementation Code

(Recommended for developers) If you want to display Blog extension features on specific section (sidebar, pages, etc...) then you can choose one of the below options.

Add below code to a CMS Page or a Static Block.

Featured Posts (Grid View) :- `{{(widget type="Pixlogix\Flexibleblog\Block\Widget\Featuredpost" category_id="2,3" blog_layout="grid" grid_column="3" max_posts="6")}}`

Latest Posts (List View) :- `{{(widget type="Pixlogix\Flexibleblog\Block\Widget\Latestpost" category_id="1,2,3,4,5" blog_layout="list" max_posts="10")}}`

Add below code to a template file and call within php tag.

Featured Posts (Grid View) :- `$this->getLayout()->createBlock('Pixlogix\Flexibleblog\Block\Widget\Featuredpost')->setData( array('category_id'=>'1,2,3', 'blog_layout'=>'grid', 'grid_column'=>3, 'max_posts'=>3) )->setTemplate('Pixlogix_Flexibleblog::widget/widget-posts-grid.phtml')->toHtml();`

Latest Posts (List View) :- `$this->getLayout()->createBlock('Pixlogix\Flexibleblog\Block\Widget\Latestpost')->setData( array('category_id'=>'1,2,3', 'blog_layout'=>'list', 'max_posts'=>2) )->setTemplate('Pixlogix_Flexibleblog::widget/widget-posts-list.phtml')->toHtml();`

Add below code to a layout file within any referenceContainer. I.e. `<referenceContainer name="content"> </referenceContainer>`

Featured Posts (Grid View) :- `<block class="Pixlogix\Flexibleblog\Block\Widget\Featuredpost" name="featured.posts.widget"> <arguments> <argument name="category_id" xsi:type="string">1,2,3,4,5</argument> <argument name="blog_layout" xsi:type="string">grid</argument> <argument name="grid_column" xsi:type="string">3</argument> <argument name="max_posts" xsi:type="string">6</argument> </arguments> </block>`

Latest Posts (List View) :- `<block class="Pixlogix\Flexibleblog\Block\Widget\Latestpost" name="latest.posts.widget"> <arguments> <argument name="category_id" xsi:type="string">1,2,3,4,5</argument> <argument name="blog_layout" xsi:type="string">list</argument> <argument name="max_posts" xsi:type="string">10</argument> </arguments> </block>`

5.1 Tag Information (Add/Edit tag)

The screenshot shows a web application interface for editing a tag. At the top, the word 'hello' is displayed on the left, and search, notification, and user icons are on the right. Below this is a navigation bar with buttons: 'Back', 'Delete Tag', 'Reset', 'Save and Continue Edit', and a prominent orange 'Save Tag' button. A sidebar on the left contains a 'TAG INFORMATION' section with a sub-item 'Tag Information' highlighted, and a 'Search Engine Optimization' section below it. The main content area is titled 'Tag Information' and contains three input fields: 'Tag Title' (with a red asterisk) containing 'hello', 'URL Key' containing 'hello', and 'Description' which has a 'Show / Hide Editor' button above a large text area. At the bottom, there is a 'Status' dropdown menu currently set to 'Enabled'.

- **Tag Title:** Tag title
- **Url Key:** Tag URL key to view tag on frontend.
- **Description:** To display tag description on frontend.
- **Status:** To enabled or disabled this tag.

13. License

What is allowed with single regular license?

- You can use it on one website for yourself or for your client.
- You will need to purchase another regular license for another domain or clients.
- You can setup extension on your staging server for testing/development purposes (that setup shouldn't be available to the public).
- You can customize extension; you can modify it with other works as per your need.
- Extension updates will be available free for single website.

What is not allowed?

- It is not allowed to create multiple websites with single regular license. You will need to purchase multiple regular licenses for multiple websites.
- It is not allowed to copy our extension code to misuse or for other extension creation or for selling purpose.

14. Help & Support

Please read "User Guide" carefully, it will help you to resolve most of potential problems with incorrect configuration of the extension in Magento. If you don't find the answer to your questions, please watch our video from below URL.

Video - Extension Installation & Blog Configuration guideline

Coming soon..! (Under Creation)

Magento Support Policy

Magento configuration, installation, maintenance, customization etc. is beyond the scope of our support. We can provide you paid support on extension setup, customization & Magento custom requirement. If you found bug within extension, please contact us at below email.

support@pixlogix.com

Developed by

PIXLOGIX INFOTECH PVT. LTD. is a multi-disciplinary, award-winning web design, development and user experience company with special focus on website usability and responsive design. The PIXLOGIX team consists of a highly experienced team of specialists with an outstanding record of providing high quality deliverables both on a timely basis and at very affordable cost.

PIXLOGIX is a Global provider of web programming and IT services with clients based in the USA, UK, Australia, Finland, Spain, Netherlands and many more. Our communication skills are excellent and are pleased to participate in providing quotations per Requests for Quotation or proposals. We guarantee your satisfaction!
